OBJECTIVE

Passionate and results-oriented Software Engineer with over 3 years of experience in developing scalable, high-performance applications. Seeking an innovative role to leverage my skills in creating impactful solutions and driving growth in the tech industry.

SKILLS

Technical Skills	React/Next.js, Vue.js, Angular, Node.js, PHP/Laravel, and Firebase.
Soft Skills	Leadership, Collaboration, Problem Solving, Time Management.

EXPERIENCE

Software Developer Clan Africa	October 2023 - Present <i>Front-end</i>
--	--

- Among the leading developer of the company's main web application using **React.js** and **Redux**, achieving a **25% increase in page loading speed** and reducing bounce rates by **15%**.
- Developed and implemented a custom design system, standardizing components and enabling faster and more consistent UI updates across projects.
- Integrated **REST APIs** and optimized client-side code, enhancing data handling efficiency and providing a smoother user experience.

PROJECTS

- **440 Shopping Platform:** Contributed to the development of **440 Shopping Platform**, a large-scale e-commerce application similar to **Jumia**, **AliExpress**, and **Konga**, built to handle a high volume of users and transactions. [View here](#)
- **Communeety:** Participated in building **Communeety**, an HR management website designed to assist HR teams in efficiently managing employee performance, attendance, and other HR tasks. [View here](#)

Software Developer SpoutGram	May 2022 - August 2023 <i>Front-end Internship</i>
--	---

- Collaborated with senior developers in achieving the aims and objectives of **SpoutGram** by integrating user engaging interfaces.
- Optimized CSS and JavaScript, leading to a **35% improvement in website load times** and enhancing SEO performance.
- Collaborated with the UX team to implement responsive designs, improving mobile usability and increasing mobile traffic by **30%**.

EDUCATION

Professional Web Development , SQI College of ICT	2021 - 2023
--	-------------

Learned everything about software development and architecture. Attained solid skills with frequent tests and practical projects day in day out.

PERSONAL PROJECTS

Postgram: Designed and developed a fully functional social media platform using **React.js**, **Node js**, and **Tanstack query** that allows users to post, like, comment, and follow other users. [View here](#)

Portfolio Builder: Created a portfolio builder for job seekers using **Vue.js** and **Laravel**, allowing users to customize and save their online portfolios. Integrated real-time editing features, which attracted users. [View here](#)
